

## Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 16, 2007

Water Body Under Evaluation:

Water Body ID #: 0956  
Name: Tributary to Willow Fork (Class C)  
Length of Segment: 0.5 miles  
County(ies): Moniteau

Use Attainability Analysis (UAA) Study:

UAA ID #: 0257  
Submitter: SES, Inc.  
Date(s) Conducted: May 15, 2007  
Date Received: June 3, 2007  
Use Evaluated: Whole Body Contact Recreation (WBCR) and  
Secondary Contact Recreation (SCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown  
Comments: The UAA survey was conducted in May 2007 and no WBCR was observed and there was no evidence of SCR in this or any of the previous UAAs. No interviews were conducted during the survey.

Is the evaluated use attainable? ☐ Yes ☒ No  
Comments: The stream did not meet depth criteria at any of the 3 sites evaluated, and there was no evidence of SCR. As a result, data in this UAA supports the 2005 Water Quality Standards where the WBCR use was not assigned. Because there was no evidence of SCR, that use also was not assigned.

**Committee Recommendation:**

☐ Add Use ☐ Retain Use ☒ Remove Use  
☐ Modify Use ☐ Inconclusive
